  - Responsive design for small devices.
  - Reusable components.
  - Displaying likers of posts, comments, and replies.

Skills: Laravel, Inertia, Vue 3, TailwindCSS, Docker and MySQL

Driving School (Appointments & Quiz) App

Description: This app was designed to streamline appointment scheduling and coordination for a driving school. It aimed to enhance efficiency and provide a seamless experience for both instructors and students.

1. User-Friendly Interface for Booking Driving Lessons:
  - Students can easily schedule driving lessons through an intuitive interface.
  - User-friendly forms guide them through the booking process.
2. Secure Authentication and Role-Based Access Control:
  - Robust authentication ensures secure access.
  - Role-based permissions allow instructors and students to access relevant features.
3. Instructor-Generated Questions (Exams) with Translations:
  - Instructors can create questions for theoretical driving exams.
  - Questions can be translated into multiple languages, accommodating diverse student needs.
4. Appointment Management:
  - Instructors can accept, reject, or delete appointment requests.
  - Multi-user search functionality allows instructors to find all appointments related to specific users.
5. Upcoming and Previous Appointments:
  - Users can view their upcoming and past appointments in dedicated sections.

Skills: Laravel, Inertia, Vue 3, TailwindCSS, Docker and MySQL

Cards Game

- Card deck management (shuffling, dealing, etc.).
- Multiplayer functionality
- Animations for card movements.
- Responsive design for different devices.
- Real-Time Playing.

Skills: Laravel, Inertia, Vue 3, TailwindCSS, Docker and MySQL

Why I’m a good candidate for the job?

- I have worked for many international companies.
- I have worked on many projects (Solo, Within a team).
- I have many years of experience.
- I’m passionate to learn.
- I can work under stress.
