Pejoal Hanna

Full-Stack Web Developer

Career Summary

Experienced Full-Stack Web Developer with over 5 years of experience in both Front-End and Back-End development. Proven track record in creating user-friendly and responsive web designs. Skilled in utilizing web development technologies to deliver clean code and implement OOP principles.

Experience

Full Stack Developer, Upwork

Remote

January 2021 - Present

- Designed and implemented user interfaces using Vue.js and React.
- Developed server-side logic using Node.js and Express.js.
- Designed RESTful APIs for communication between the front-end and back-end.
- Managed databases using MongoDB and SQL.
- Ensured web applications were fully responsive and optimized for mobile devices.
- Created and managed databases for efficient data storage and retrieval.
- Implemented various security measures in applications, including user authentication and authorization.
- Wrote comprehensive unit tests using testing frameworks like PHPUnit and Cypress.
- Collaborated with cross-functional teams, including designers, project managers, and other developers.
- Wrote clear and concise technical documentation.

Full Stack Web Developer, Freelancer.com

Remote

January 2020 - Present

- Developed and maintained reusable components to streamline development processes.
- Implemented real-time features using WebSocket and Pusher.
- Ensured cross-browser compatibility and responsiveness for web applications.
- Managed databases using SQL and NoSQL technologies.
- Conducted code reviews to ensure code quality and adherence to best practices.
- Optimized application performance, including load times and responsiveness.
- Implemented security best practices, including user authentication and data encryption.
- Collaborated with cross-functional teams to deliver high-quality products.
- Set up and maintained CI/CD pipelines for automated testing, building, and deployment.
- Troubleshoot and resolved issues across the entire stack, ensuring smooth operation of applications.

Full Stack Developer, OneXpand

Remote

March 2023 - December 2023

- Developed an Enterprise Resource Planning (ERP) and Customer Relationship Management (CRM) system.
- Streamlined business processes and operations, including sales, HR, and inventory management.
- Improved customer service, marketing, and communication strategies.
- Used technologies include jQuery and Bootstrap for the frontend, Laravel for the backend, and MySQL for the database.

Full Stack Developer, Improov

Remote

September 2022 - February 2023

- Developed and maintained web applications using Vue.js, Laravel, and MariaDB.
- Worked closely with the product team to design and implement new features.
- Worked with the QA team to identify and fix bugs.
- Played a key role in migrating legacy systems to modern architectures, improving performance and scalability.
- Contributed to major projects, including the development of a property management system.

Education

B.Sc. in Information Technology & Business Management

MIS & IT Department, SAMS, Egypt

Oct 2021 – Aug 2023

Specialized in Information Technology and Business Management, gaining comprehensive knowledge in both fields.

Certifications

B1 German Certificate

Goethe Institute

April 2022

Social Network Platform

Feb 2023 - Present

Associated with Freelancer.com

A social media application developed using Vue.js and Laravel. The app includes features like user authentication, real-time chat, post creation and management, likes, comments, and a friend system. It also includes a responsive design for both desktop and mobile devices.

Skills: Laravel · Pusher · WebSocket · MariaDB · Tailwind CSS · Vue.js

Driving School (Appointments & Quiz) App

Aug 2023 - Present

Associated with Upwork

This app was designed to streamline appointment scheduling and coordination for a driving school. It aimed to enhance efficiency and provide a seamless experience for both instructors and students.

Skills: Laravel · Tailwind CSS · Vue.js · Inertia.js · MariaDB

Cards Game

Feb 2024 - Present

A multiplayer card game with features such as card deck management (shuffling, dealing, etc.), animations for card movements, responsive design for different devices, and real-time playing. Developed using Laravel, Inertia, Vue 3, TailwindCSS, Docker, and MySQL.

Skills: Laravel · Vue.js · MariaDB · PHP · PhpMyAdmin · Tailwind CSS · Front-End Development · Back-End Web Development

E-Commerce App

E-Commerce Website

Aug 2024 - Present

This is an E-commerce project that I developed using Vue.js and Laravel. It features a user-friendly interface with a responsive design that works well on both desktop and mobile devices. The application includes features such as user authentication, product listing, shopping cart functionality, and secure payment processing. It also has an admin panel for managing products, orders, and users.

Skills: Laravel · Vue.js · Tailwind CSS · Inertia.js · MariaDB · E-Commerce

Portfolio Website

Oct 2024 - Present

Welcome to my portfolio! I'm a Full Stack Developer specializing in Vue.js, Laravel, and MariaDB. Here, you'll find a collection of my work, showcasing my ability to create efficient, user-friendly web applications. From an E-commerce platform with a responsive design and secure payment processing, to a social media app with real-time chat and post management, each project demonstrates my technical skills and commitment to delivering high-quality results. I also have experience in creating games and appointment scheduling apps. Explore my projects to see how I can help transform your ideas into reality.

Skills: React.js · Vue.js · Laravel · Tailwind CSS · PHP · PhpMyAdmin
